LOWER LEVEL: Available ALL DECK, HALF DECK or without a DECK.

Optional WOOD ROOF for PLAY TOWER

Picnic Tables are available in 36" and 57"

## 10 Reasons to Buy an Outdoor Play System:

- 1 Why spend hundreds or thousands of dollars more for something your child will use for 15 years?
- 2 Our sets are very modular. Design your own outdoor play system using our components.
- 3 Built to outlast the play years of your child.
- 4 We use all wood framing which, unlike vinyl, is a renewable resource.
- 5 No vinyl sleeves that can be cracked when cold.
- 6 Wooden decks and railings mean no static from vinyl to shock your child.
- 7 More activities for a lot less money.
- 8 Damaged parts are easily replaced. Contact Outdoor Play Systems or go to your local lumber yard.
- 9 Availability is two to three weeks from our plant. (availability may vary depending on distributor's location.)
- 10 We use Wolmanized® Wood products.

Wood Treated Right™

The Wolmanized® brand has long been the leading name in the wood protection industry. It's been the most widely known name, and the most heavily promoted. Now it has a powerful new recognition that distinguishes it from the alternatives:

It has earned the GOOD HOUSEKEEPING SEAL.

Our pieces are constructed from premium grade, southern yellow pine that is pressure treated for residential outdoor wood that leaves wood with a natural appearance.

Outdoor wood can be painted or stained and is more economical than durable grades of redwood and cedar or plastic composites. And it's made from a renewable resource that's treated to last for decades, reducing demands on forests. Wolmanized outdoor wood is environmentally responsible, uses common species of rapidly replenished trees, preserved in a nonpolluting, energy-efficient process that reduces demand on forest resources. Used and recommended by Dean Johnson, host of the popular TV series, HOMETIME.

Your Outdoor Play System will be built using Wolmanized® Residential Outdoor® Wood that has earned the GOOD HOUSEKEEPING SEAL.

OUTDOOR PLAY SYSTEMS reserves the right to make minor product modifications to improve safety and or the value of all OUTDOOR PLAY SYSTEMS.

### Maintenance:

OUTDOOR PLAY SYSTEMS recommends that all wood parts be given an application of water sealant to protect its smooth finish and natural beauty.

### Customer's Responsibility:

Site must be prepared and accessible. For playhouses, we need clearance as wide as your playhouse plus six inches unless special arrangements have been made.

We are not equipped to remove trees, shrubs and some types of fences. There will be an additional charge for having to return because of inaccessibility.
